ecoVerde

100% recycled.
100% performance.
100% Revolutionary

What some people call eco-fashion, we call a great idea. Turning old plastic bottles into new possibilities. Making things that matter. And helping you achieve your environmental mission with EcoVerde – our sustainable line of 100% recycled premium sewing threads.
Recycle. Repurpose. Repeat.

As the only globally available 100% recycled line of premium corespun and textured sewing threads on the market today, Coats EcoVerde offers the same proven level of performance as the industry’s leading non-recycled threads.

EcoVerde threads help complete the loop for garments and accessories that already use recycled polyester fabrics or other eco-friendly fabrics or materials.
Used plastic (PET) bottles are collected from consumers, sorted, cleaned, ground to flakes and then melted down and extruded into the fibre and filaments from which EcoVerde sewing threads are made. Because it consists entirely of recycled plastic fibres, Coats EcoVerde has a significantly lower carbon footprint than virgin fibres.

**Features & Benefits**

- Versatile fit for purpose, premium sewing threads
- Made from 100% post-consumer recycled PET
- No compromise on quality or performance

- No downtime, retrofitting or production slowdown if already using a Coats Epic or Gramax
- Approved by the U.S. Environmental Protection Agency
- Öko-Tex certified
Coats Epic EcoVerde is a 100% recycled premium polyester corespun sewing thread that has been precisely engineered to create durable, attractive seams across a wide range of recycled fabrics and materials. From delicate silks and leisurewear to robust denims, Epic EcoVerde ensures an excellent stitch formation and seam appearance – even under the most demanding production line conditions.

100% Fashionable
Main Uses

- Fashion apparel
- Blouses and shirts
- Jackets and dress slacks
- Lingerie and swimsuits
- Uniforms and workwear
- Jeanswear

Features & Benefits

- Stronger, more durable, precisely engineered sewing with lower repair rates, lower returns to manufacturer, lower irregulars, and increased productivity
- World-class quality, greater abrasion resistance, and perfect colour matching
- A high strength core allows use of finer threads and needles without compromising strength
- Excellent colour fastness performance level
- Approved by U.S. Environmental Protection Agency
- Öko-Tex certified
- Meets Coats restricted substance list

Coats Gramax EcoVerde is a 100% recycled polyester continuous filament textured thread. The textured filaments give the thread a soft feel and make it ideal for use in the loopers of overlocking, serging and cover seaming to provide softness and comfort, especially in “next to skin” seams.

Global availability. Global support.
Main Uses

- Underwear
- Swimwear
- Leisurewear
- Knitwear
- Babywear
- Household textiles

Features & Benefits

Good seam coverage and softness for neat, comfortable seams

Low shrinkage property ensures no seam distortion after washing

High level of colour fastness even in demanding washing conditions

Approved by U.S. Environmental Protection Agency

Öko-Tex certified

Meets Coats restricted substance list

100% Right
Right for your brand, your bottom line, and the planet we share.
Coats Corporate Responsibility
As the world's largest sewing thread manufacturer, we are committed to minimising our environmental footprint across our supply chain. Steps we have taken include using more biodegradable products, consuming less energy, and lowering CO₂ emissions.

Precise Colour Matching
For over 40 years, our industry expertise has ensured precision, accuracy and speed in every colour matching process – from design to development to the finished product.

Coats Technical Services
With a proven ability to help you create exciting new products and innovative technical solutions, our global team of experts are always available to provide guidance and support.
Ready to take your brand to the next level of sustainability?
