

CoatsKnit™ Protect

CoatsKnit Protect is a 100% polyester yarn treated with an innovative process to give the finished yarn anti-microbial / anti-fungal properties.

The anti-microbial process creates a "zone of inhibition" that prevents the growth of bacteria and pathogens on the yarn where microbes like to harbour, leaving fabric crevices clean and fresh.

As a part of our commitment to building a sustainable future, CoatsKnit Protect can be produced from 100% GRS certified recycled materials as well as virgin origin.

EXPERT REAL WORLD SUPPORT

The final cost of any thread also includes hidden costs, fuelled by the methods and tools applied to it. Our experts know exactly how to reduce those costs, save time and increase productivity.

One to One Visits

There's no need to come to us, our experts will travel to your site. In person, online or via the phone, our trained consultants deal with the kind of issues any busy factory may face, providing a solution for today and a blueprint for future efficiency.

Training and Presentations

From yarn selection to stitch formation, the use of colour to solutions for common production issues, we take the learning gathered through years of hands on experience and present it in the form of high impact seminars, workshops and presentations.

Innovation Hub

Collaborate directly with expert R&D technologists at our Innovation Hub to create pioneering and tailored solutions for products ranging from Performance Materials to Apparel and Footwear. Equipped with state-of-the-art technology, we quickly turn ideas into prototype designs ready for manufacturing.

To drive your hidden costs down, talk to Coats. From thread audits in pre-production to the latest technical bulletins, we'll provide support that achieves measurable results.
