

# COATS<sup>®</sup> FLAMEPRO<sup>™</sup> PROTECT+

FlamePro Protect+ is a range of flame resistant, electric arc and molten metal splash resistant yarns with an inherent anti-microbial solution built into product DNA, inhibiting the growth of microbes in or on fabrics while providing all-day freshness

FlamePro Protect+ is an anti-microbial yarn that provides a sustainable option for your requirements. FlamePro Protect+ will stand up to peroxide and bleach and is tested effective after 100 industrial launderings. Textiles created from these spun yarns require no wet processing after fabric formation to achieve these properties.

## FEATURES & BENEFITS:

- Inherent anti-microbial solutions that boost protection against microbes
- With silver and copper salts embedded, FlamePro Protect+ does not wear off, wash away or weaken over time
- No topical treatment
- Provides peace of mind and enhances your product capabilities
- Global sourcing and availability

## MAIN USES:

Military gear

Firefighter gear

Consumer PPE

Industrial PPE
