

Opti M Ultra

Brilliant gloss

Zip models and functions:
M46 CE and OE
M60 – all functions
M80 – all functions

Main uses
Apparel
Footwear
Ladies hand bags
Leather goods

Benefits

Brilliant gloss and smooth – this is how the new Ultra finish for the whole family of our standard metal zips look.

Technical characteristics

Opti Ultra M zips are produced through a proprietary process on the metal in place of the standard wire brushing used on conventional metal zips.

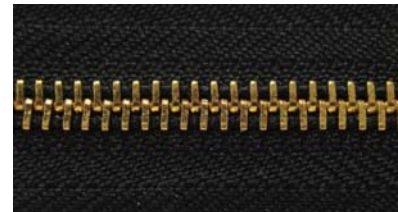

The metal components are deburred and abraded uniformly in all areas including those that are not easily accessible for mechanical processes.

The result is an excellent looking zip that is uniformly shiny and one that opens and closes very smoothly.

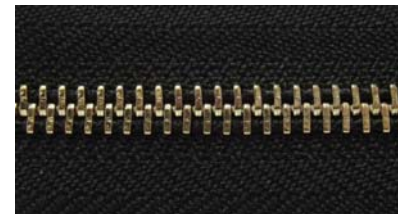

Recommendations:

Before proceeding to bulk production, Coats Opti recommends that you run tests and production trials on all zip uses/applications in order to verify that the product meets the end user requirements as well as the demands of internal processing conditions.
