

# Opti S Black Line

## Benefits

Opti S60 Black line is a feature zip that can add a new delicate and fashionable look to the final product. The black spiral is interwoven with any tape shade to create a sense of contrast, intensity of colour and emphasised elegance.

## Description

Opti S Black Line is produced by interweaving a black monofilament spiral with a tape of polyester yarns. The tape can be dyed in any shade but the spiral stays always black as well as the slider, forming the black line.

## Tape options

Dark shades of tape are not aesthetically suitable.

Opti S Black Line is available in:

- Reversed option (image 1) - delivering a thin black line in the middle of the textile tapes.
- Broken twill (BT) (image 2) - adding modern and fresh look to the final product.
- Stipple reflective (image 3) - a combination of safety elements and contrast tapes, can also be reversed to make a much flatter chain option ideal for activewear and backpacks.
