

Coats Sylko Metallic Shade Card

Coats Sylko Metallic Metallised embroidery thread

CC-SCSYLKOMET3617

Coats Sylko Metallic is a highly engineered composite thread for machine embroidery and decorative sewing.

Its superior lustre and trouble-free operation makes Sylko Metallic a popular choice amongst the world's best embroiderers seeking outstanding performance and luxurious embellishment. Sylko Metallic can also be used in the top spreader of coverseams to give a pretty, decorative seam with a metallic or sparkle effect.

Coats threads are manufactured and quality controlled to the highest standards possible. Since the conditions of use, washing, pressing and cleaning etc. vary, the purchaser should assure themselves by preliminary tests that the dye fastness of the yarn or thread is 100% colourfast to crocking or washing under all conditions. We cannot be responsible for any consequential damages howsoever caused since the value of the thread is so disproportionate to the value of the goods into which it is stitched.

Coats Sylko Metallic is made from a combination of polyester, nylon and precious metals. The resistance to any particular chemical will depend on the individual circumstances. Technical advice should be sought from your nearest Coats unit if the application involves chemical treatment. These shades have a pure silver coating & should not be used for embroidery on leather goods that have been treated with tannin as oxidation/discolouration could occur; I9681, I9682, I9683, I9684, I8912, I8913, I8911, MT009, MT017, MT018, MT019, MT020, MT022. The construction of Sylko Metallic for shades I9685 and I8986 is slightly different, the core yarn is viscose in place of nylon.

Due to the extensive shade range of Sylko Metallic and extreme fluctuations in demand we ask for your understanding that not all shades are available in all markets. The 12 most popular shades are on the first strip.
