

# COATS<sup>®</sup> ARMOREN<sup>™</sup> PROTECT+

Armoren Protect+ is a range of cut resistant yarns with an inherent anti-microbial solution built into product DNA, inhibiting the growth of microbes in or on fabrics while providing all-day freshness

Armoren Protect+ is an anti-microbial yarn that provides a sustainable option for your requirements. Armoren Protect+ will stand up to peroxide and bleach and is tested effective after 100 industrial launderings. Textiles created from these spun yarns require no wet processing after fabric formation to achieve these properties.

---

## FEATURES & BENEFITS:

- Inherent anti-microbial solutions that boost protection against microbes
- With silver and copper salts embedded, Armoren Protect+ does not wear off, wash away or weaken over time
- No topical treatment
- Provides peace of mind and enhances your product capabilities
