

Rhenoprint™

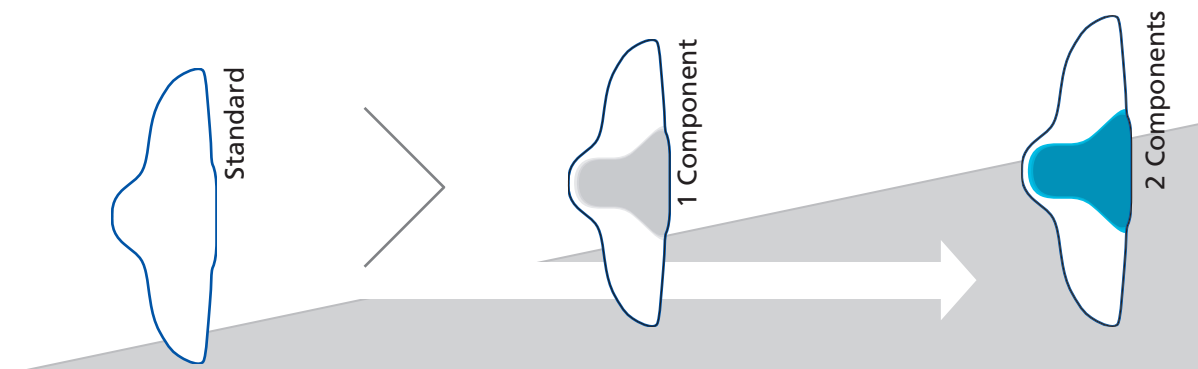

AND IT'S TECHNOLOGICAL EVOLUTION

- NO CUTTING AND SKIVING
- NEARLY EVERY SHAPE IS FEASIBLE
- ATTRACTIVE CO2 FOOTPRINT
- FULLY AUTOMIZED MASS PRODUCTION
- LOCAL PRODUCTION SITES

MULTIZONE

THE NEXT GENERATION OF RHENOPRINT™
A technological evolution with more benefits than ever.

LIGHTWEIGHT

Different thickness areas are visible. They can differ up to 0.40 mm within one reinforcement.

REDUCTION OF X-RAYS

Super smooth transition zones from zero to desired thickness reduce visible edges.

PROCESS RELIABILITY

Different thickness zones within one counter lead to a better activation. And no changes in the production process are needed.

COMFORT

Customized hard- and thickness zones within one pattern lead to higher comfort. Soft and firm parts can be right next to each other.
