

Energy Policy

We are the world's leading industrial thread business, harnessing talent and technology in textiles to enhance people's lives. Limiting our impact on the environment is a fundamental part of our business and is something everyone in Coats takes seriously. As an business we have identified that our use of energy is fundamental to supporting our overall environmental policy and initiatives to be a sustainable manufacture.

Coats senior management has defined objectives and set targets to reduce the amount of energy we consume to manufacture our threads, yarns.

We are committed to:

- Implement an effective energy management system to monitor and measure energy consumption
- Ensure continual improvement in our energy performance in terms of kWh/kg
- Deploy information and resources to achieve our objectives and targets
- Meet legal and other requirements regarding energy performance

We are support to:

- Consider energy performance improvements in design and modification of our facilities, equipment, systems and processes
- Effectively procure and utilise energy-efficient products and services and renewable energy technologies, where feasible

We will regularly review this Energy Policy to ensure it helps us meet our agreed goals.

Management
