Nylon has lower wash fastness properties than polyester and we recommend taking extra care when using textured nylon looper or cover threads in combination with polyester needle threads as a colour difference is likely to emerge with frequent domestic washing during the lifetime of the garment. Coats threads are manufactured and quality controlled to the highest standards possible. Since the conditions of use, washing, pressing and cleaning etc. vary, the purchasers should assure themselves by preliminary tests that the dye fastness of the yarn or thread is 100% colourfast to crocking or washing under all conditions. We cannot be responsible for any consequential damages howsoever caused since the value of the thread is so disproportionate to the value of the goods into which it is stitched.

Please note this is a colour reference and should be used for guideline purposes only.

We strongly advise against printing this shade card, as lighting conditions and printer limitations may distort the final colour displayed.

For a true representation of the desired shade against fabric material, a physical shade card should be used.
